Center for Open Science: co-Founder, Executive Director

Web site: <http://cos.io/>

Primary infrastructure: <http://osf.io/>

A non-profit organization that aims to increase openness, integrity, and reproducibility of scientific research. Building tools to facilitate scientists' workflow, project management, transparency, and sharing. Community-building for open science practices. Supporting metascience research.

Project Implicit: co-Founder

Information Site: <http://projectimplicit.net/>

Research and Education Portal: <https://implicit.harvard.edu/>

Project Implicit is a multidisciplinary collaboration and non-profit for research and education in the social and behavioral sciences, especially for research in implicit social cognition. With a staff of research scientists, developers, and technicians, Project Implicit is working toward (a) methodological innovation to increase the viability of psychological research on the Internet, (b) building software to

make web-based research more accessible to scientists, (c) providing impetus for methodological and theoretical innovation in implicit social cognition, and (d) disseminating basic psychological research worldwide through description and interactive demonstration.

Research Interests

Values and practices; Open science; Metascience; Implicit cognition; Automaticity; Ideology; Attitudes, beliefs, and identity; Morality; Stereotyping and prejudice; Social cognition; Political psychology; Research methodology; Quantitative methods; Technology and Innovation
