* derived from PVIbprep.2.subexcl.html or PVIbprep.3.IATbySUBEXCL.html file for each task.

Exclusion criteria:

0 = valid IAT

1 = missing data for one or more critical blocks, either technical data-transfer problem or voluntary dropout

2 = less than 15 valid trials in any one critical block, probably data-transfer problem

3 = too fast (< 300ms) on more than 10% of responses across all critical blocks

4 = 25% of responses too fast in any one of the critical blocks

5 = 35% too fast in any one of the practice blocks

6 = making more than 30% erroneous responses across the critical blocks

7 = 40% errors in any one of the critical blocks

8 = 40% errors across all of the practice blocks

9 = 50% errors in any one of the practice blocks
